# THE NEW STANDARD IN

## **RESIN** EPOXY CONSTRUCTION

Epoxy is stronger than the normal water base glue (the industry standard).

Since epoxy is so strong, less of it is used yielding a considerably lighter, stronger, and stiffer deck which keeps it's pop longer.

### lighter

& stronger than  
the standard 7-ply

### stronger

8-ply, same weight as standard 7-ply.  
significantly stronger.

### lasts longer

9-ply, strongest all wood deck  
in the industry.

See how strong our Resin boards are at [www.dwindle.com/ResinClip](http://www.dwindle.com/ResinClip)

Resin is also used in these  
other premium constructions.

# ALL WOOD SKATEBOARDS

**RESIN-7**  
7-PLY EPOXY CONSTRUCTION

"So strong and light, I would beat my wife with it."  
- Jerry Hsu (enjo)

"The resin makes them stiffer, with snappy pops."  
- Jake Brown (Blind)

**RESIN-8**  
8-PLY EPOXY CONSTRUCTION

"The new resin construction is out of this world, the boards last longer and have more pop. The next great thing in skateboarding construction... I give them an 11 out of 10." - Corey Sheppard (Blind)

"Resin 8 construction gets an A+."  
- Ronnie Creager (Blind)

**RESIN-9**  
9-PLY EPOXY CONSTRUCTION

"I ride the Resin 9 and the construction is unbeatable. I have yet to break one of these, I ride them at least twice as long as the regular boards and in most cases wear out the tail before the pop."  
- Paul Machnau (Darkstar)

OUR RIDERS RELY ON RESIN BOARDS FOR UNMATCHED QUALITY AND SO CAN YOU. DWINDLE RESIN BOARDS DON'T WARP.

"Now that the dwindle resin's aren't twisting on my wall, it saves me some time to chase the other suppliers on my returns and credits... or better yet, sell what I own." - Josh Ball Fairman's PA

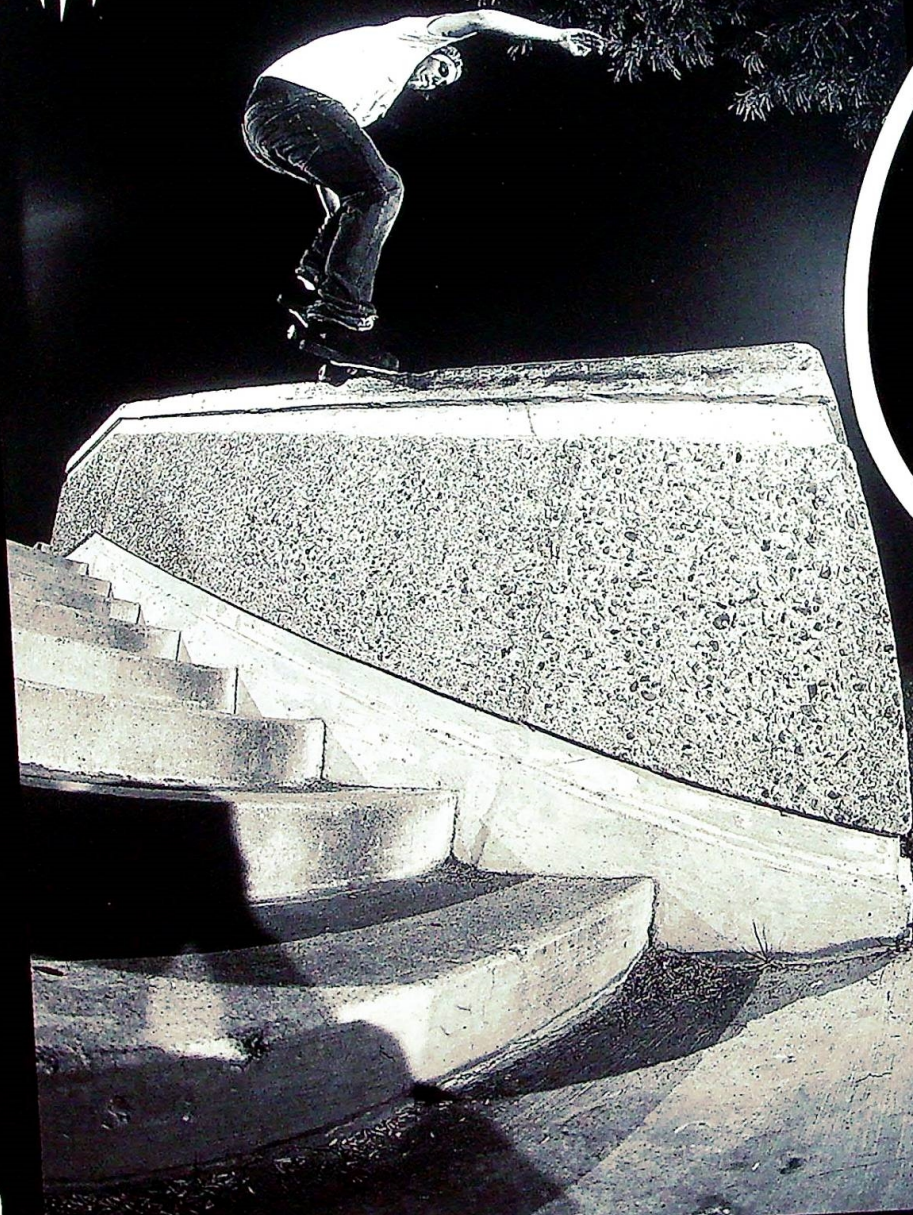

DWINDLE WILL REPLACE ANY WARPED RESIN BOARD REGARDLESS OF AGE.

"Resin decks are stiffer, stronger, and last me twice as long."  
- Daewon Song (Almost)

**LOWER KINGPIN** We dropped the head by 1/8"—no snagging. There are a few ways to do this, so we chose the least disruptive method, preserving the height, weight, and turning radius. First, we effectively shortened the kingpin; second, we dropped the "seat" of the bottom bushing on the baseplate; last, we pulled the "ring" (top-bushing seat) deeper, away from the axle. This does affect the feel of the truck due to increased leverage on the bushing, so we treaded lightly. While 1/8" isn't much, it should be enough.

**TIGHTER FIT** The fit of the hanger on the bushing was a bit "loose," which became more noticeable as the bushings and pivot cup compressed and stretched over their natural lifespan. The new precision fit creates a more solid, responsive feel.

**QUICKER TURN** This was the last adjustment, compensating for the subtle geometrical effects of the first two, plus quickening the turn a bit simply because we felt the truck needed it.

**WE DID A LOT OF WORK ON THE NEW MID. WHEREAS THE MODIFICATIONS OF THE LO WERE AIMED AT TIGHTENING AND HONING ITS BASIC CHARACTERISTICS, NEARLY EVERY FEATURE OF THE MID HAS BEEN REWORKED.**

**LOWER KINGPIN** THE KINGPIN IS MUCH LOWER. WE TOOK SIMILAR STEPS TO WHAT WE DID FOR THE LO, ONLY EVERYTHING DOUBLED: FIRST, WE EFFECTIVELY SHORTENED THE KINGPIN; SECOND, WE DROPPED THE "SEAT" OF THE BOTTOM BUSHING ON THE BASEPLATE; LAST, WE PULLED THE "RING" (TOP-BUSHING SEAT) DEEPER, AWAY FROM THE AXLE.

**SHARPER TURNING** THIS WAS A TWO-STEP PROCESS. FIRST, WE LENGTHENED THE PIVOT STEM, THEN LOWERED THE HEIGHT OF THE PIVOT CUP. THIS ALLOWS FOR MORE OF A FLOWING SENSATION INTO TURNS, LESSENING THE EMPHASIS ON OVERALL STABILITY.

**HEIGHTENED RESPONSE** THERE WAS A SLIGHT DECREASE IN THE BASEPLATE'S KINGPIN-TO-PIVOT DISTANCE, MEANING THE HANGER'S LOOP-TO-AXLE DISTANCE WAS COMPRESSED AS WELL. THIS LIVENS THINGS UP A BIT.

**THICKER BARREL** WE BEEFED UP THE REGION AROUND THE AXLE: BIGGER RADIUS, BETTER GRIND.

**MODIFIED LOOK** THE BASEPLATE IS CLEANER THAN IT USED TO BE, AND THE REGION AROUND THE PIVOT STEM (ON THE HANGER) HAS MORE CLEARANCE WITH REGARD TO THE BASEPLATE/CUP.

**TIGHTER FIT** THE FIT OF THE HANGER ON THE BUSHING WAS A BIT "LOOSE," WHICH BECAME MORE NOTICEABLE AS THE BUSHINGS AND PIVOT CUP COMPRESSED AND STRETCHED OVER THEIR NATURAL LIFESPAN. THE NEW PRECISION FIT CREATES A MORE SOLID, ACCURATE FEEL.

## STREET BEARINGS

SKATEBOARDING PUTS TREMENDOUS TORSIONAL LOADS ON THE BALL SET WITHIN THE BEARING, DEGRADING ITS ABILITY TO PERFORM AND RAPIDLY DIMINISHING ITS LIFE. TENSOR CHOSE THE OUST DESIGN BECAUSE WE BELIEVE THE BEARINGS ARE MADE TO WITHSTAND THE RIGORS OF TODAY'S STREET SKATING BETTER THAN ANY OTHER BEARING AVAILABLE. OUST HAS A PATENT PENDING ON THE TAILORED SHAPE OF A DEEPER GROOVE WITHIN THE RACE DESIGNED TO SPREAD THE LOAD OF THE BALLS EVENLY AS IT HOLDS THE BALLS BETTER IN PLACE. THIS FUNDAMENTAL DESIGN CHANGE GIVES IT A HUGE ADVANTAGE IN PERFORMANCE AND LONGEVITY WHICH YOU WILL FEEL FROM THE FIRST PUSH YOU TAKE.

### THE DEEPER RACE STRENGTHENS THE BEARING

- ENHANCED RACE DESIGN
- ULTRA LIGHT, PATENTED LUBRICANT
- STEEL SHIELDS WITH MODIFIED DESIGN TO REDUCE DRAG

# world industries completes

**For nearly 20 years** World Industries has been a leader in providing the highest quality, professional grade skateboards.

Today World offers that same high quality in our line of complete skateboards that are both affordable and produced with the same high quality materials as our top of the line products.

Available in 10 different graphic designs and a wide selection of sizes, World Completes accommodate the youngest riders all the way up to the advanced rippers. Our success in making great completes starts by using great components. All World completes start with the same premium quality decks as our pro models. Each deck is pressed with hand selected Canadian maple veneers to guarantee strength, and laminated with STIFFGlue™ to provide incredible durability. World completes are ideal for the core rider who is looking for the advantages of a better concave, superior wheel urethane, and a highly tuned setup. Our completes use our most recent specifications with noticeably superior components, including our ABEC 5 World Industries bearings and lightweight World Industries trucks. Assembled from our premium quality decks and wheels, these completes are ready for high performance shredding and long-lasting ripping!

Available: 2/15

# SPEED DEMONS

**SPEED DEMONS QUALITY AND FUNCTION FOR THE PRICE CONSCIOUS SKATEBOARDER.**

What you need to know.

- Price points and margins are comparable to shop boards and blanks (without the hassle of shop deck minimums)
- Don't tie up cash or space, use our warehouse as yours!
- Speed Demons sales go directly back into the marketing of pro skateboarding for the health of the industry.
- Quality you can trust.
